Title: Prod Support Developer
Location: NYC, NY
Travel: None
TYPE : Contract

Position Description:

This is a very long term contract position. It is supporting an existing system that processes trades. The majority of work is ensuring the trades are processed correctly, correcting problems with incoming feeds and ensuring the business users are happy. There is development work, usually in Perl and/or Java, as new clients or requirements come up. When a problem arises – you have to be focused and ready for intense activity. You will be part of a 3 person team. The ability to “get things done” while still “doing things the right way” will be the key to success. Strong SQL and scripting skills, together with analytical and trouble shooting skills are key.

Qualifications/Skills Requirements:

- Technologies include Perl, Sybase, SybPerl, Linux and Java.
- 5+ years professional experience.
- Bachelors degree
- Very strong ability in scripting languages.
- Experience with trade processing,
